Period for	The MAILING DATE of this communication ap Reply	opears on the cover sheet with the	correspondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/13/2006 has been entered.

Claims 1-6 and 10-11 are currently pending with the application. Claims 1, 4 and 10 were amended. Claims 7-9 and 12-24 were cancelled.

Response to Arguments

Applicant's arguments with respect to claims filed 11/13/2006 have been fully considered, applicants are correct in that Dunand fails to teach the conductivity through the conductive material, but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1751

 Claims 1, 3-4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dubots et al (US 4,594,218).

Dubots et al teach the composition of a metal matrix composite comprising the particles of a chevrel phase lead-molybdenum-chalcogenide (Superconductor) and a matrix of gallium powder (conductive material). The amount of the conductive particles ranged from twenty to thirty percent or more of the mixture. The component powders were thoroughly mixed, cold pressed, inserted/filled inside a Nb tube, vacuum sealed and cold drawn in to a wire (elongated member) (Abstract, Cl-1, Ln 55 to Cl-2, Ln 65). The amount of second powder of 30% or more of the mixture (Cl-2, Ln 29-30, 63) as gallium will be about 30 vol% or more of the composition (densities: chevrel phase-6.2 g/cc, gallium-5.9 g.cc)

The prior art fails to teach the limitation of the proximity unbroken section of conductive material, conductive material being driven to superconductive state, and conduction primarily through conductive material in claim-1, and the limitation of the proximity unbroken section of conductive material, conductive and material being driven to superconductive state in claims 4 and 10.

However, the prior art composition, components used to make the composition, the component ratios and the method of making the composition are similar to that taught by the applicants (Specification: Para 0069, 0071, 0074, 0102, 0172,0181) and further having the same utility as a superconductor, and prima facie obviousness exits for the presence of instant claimed limitations in the prior art composition.

Allowable Subject Matter

Claims 2, 5-6 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim/s and any intervening claims.

The prior art of record neither teaches nor fairly suggest a composition containing MgB2 and a method of making the composition meeting the limitations of the applicants.

Application/Control Number: 10/697,861

Art Unit: 1751

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kallambella Vijayakumar whose telephone number is 571-272-1324. The examiner can

normally be reached on 8.30-6.00 Mon-Thu, 8.30-5.00 Alt Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Douglas McGinty can be reached on 571-272-1029. The fax phone number for the organization where

this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)

at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative

or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-

1000.
